Web Technology with UI/UX

Assignment 1 [UNIT: 1]

NAME: ROHAN M. GADHER

ENROLLMENT NO: 2401031000025

B. TECH “IT”

DIV: A1.

Task-1:

Create a GIT repository named as your Enrollment number. Create 2 folder in your repository named as Assignment_1 and Assignment_2.

Prepare a word file which contains each step of this task.

Upload your assignments in the respective folder. Share your git repository link in a google form asked to you at the time of submission.

Task-2:

Prepare a prototype design of any website in Figma which contains at least 8-10 screen or maximum as required. Upload screen design in assignment_1 folder.

Step-by-Step Guide: Creating Your Repository

1. Log in to your GitHub account.
2. Click the **+** icon in the top right corner and select **New repository**.
3. **Repository name:** Enter your specific **Enrollment Number** (e.g., **2401031000025_rohan-gadher**).
4. **Public/Private:** Choose based on your instructor's preference (**Public** is common for grading).
5. **Initialize:** Check the box that says **Add a README file**.
6. Click **Create repository**.

Step 2: Create the Folders

GitHub doesn't allow you to create empty folders; folders must contain at least one file. We will create a placeholder file in each.

For Assignment_1:

1. Inside your new repo, click **Add file** > **Create new file**.
2. In the filename box, type: Assignment_1/.gitkeep
    - *Note: The / automatically creates the folder.*
3. Scroll down and click **Commit changes**.

For Assignment_2:

1. Go back to the main page of your repository.
2. Click **Add file** > **Create new file**.
3. In the filename box, type: Assignment_2/.gitkeep
4. Scroll down and click **Commit changes**.

Repository Structure Overview

Your repository should now look like this:

Item	Type	Purpose
[Enrollment_Number]	Root Folder	Main Repository
📁 **Assignment_1**	Folder	Contains first set of tasks
📁 **Assignment_2**	Folder	Contains second set of tasks
📄 **README.md**	File	Project description
